

# Portable Medical X-Ray with Adjustable Stand

The 135HF+MS portable medical x-ray is a powerful and lightweight unit intended for nursing homes, mobile radiologists, and practices that wish to share an x-ray unit. Only 99lbs and foldable to be only 30" tall, the 135HF+MS portable medical X-ray can be easily loaded into mini-vans, station wagons, or SUVs for transport between facilities or residences. The big wheels make for easy movement outdoors and up short flights of steps if you must visit a non-wheelchair accessible location.

The 100kV, 35mA generator provides enough power for extremity shots and most chest and torso views on medium sized individuals. All human portable units come with the necessary skin guard and collimator modifications to meet medical requirements.

## Features...

- 100kV, 35mA high frequency generator
- Clear images for any extremity shot
- Powerful enough for chest shots
- Digital display with soft touch pushbutton controls
