

# Porta Sump 4

Portable Sump Reservoir with Automatic Pump

The Porta Sump 4 is the solution for those that do not have a floor drain, but require one due to equipment that drains close to ground level, a cleaning project using water, or any reason for fluid drainage close to ground level. A 10 gallon (38 liter) chemical resistant container collects the fluid, and a submersible pump is connected to a diaphragm switch to enable automatic emptying of the container. The pump will discharge the fluid from the container through tubing into a sink, utility tub, or even connect to 1 & 1/4" PVC.

## FEATURES & BENEFITS

- Eliminates the need to add costly floor or wall drains
- Automatically pumps fluids into a sink, utility tub, or directly into PVC plumbing
- Cover with cutout for wires & tubing
- UL & CE agency approvals
- 1 year warranty

## WHAT TO ORDER

Porta Sump 4 - For discharge into a sink or utility tub up to a 4' height

PS4-PVC - Adapter to use on the end of the supplied tubing to connect into 1 & 1/4" PVC pipe.
