

Veterinary Laser Therapy

Quality Therapy Lasers for Wound Healing and Pain Management

PowerTwin 21

The PowerTwin 21 is the latest evolution in therapy laser brushes. Interchangeable adaptor heads are included: the flat adaptor head for a lasershower effect to promote wound healing in a shaved area and the bristle brush adaptor head to penetrate below the fur for pain management. The adaptor heads are easily interchangeable and autoclavable. 21 laser diodes irradiate a large area with powerful laser therapy. Dose level, operating mode and time are displayed on a color screen and are easily adjustable. 10 programmable settings are available to customize.

VetBeam PowerPlus

The VetBeam Laser Brush comes in a basic, economical version with 5 laser diodes, or in the PowerPlus version with 14 laser diodes. Both versions utilize fiber optic technology to deliver the laser therapy through the brush's bristles to the tip of the bristle, below the fur and directly to the animal's skin. The laser therapy reaches the skin via the bristles through a gentle brushing action that is soothing to the animal while it is simple and effective for the veterinarian or technician.

SPECIFICATIONS

PowerTwin 21

- 21 x 50mW laser diodes for total 1.05 Watts of power
- Works on 110VAC

VetBeam PowerPlus

- 5 x 20mW or 14 x 50mW laser diodes
- Works on 110VAC
