

VIBRAPORT®

For nearly 50 years, G5™ Massage Machines have led the industry in machine-assisted vibratory wave therapy for massage, cellulite and skin care treatment. The Vibraport® Facial System is the most effective and easiest way to perform profitable facial muscle treatments. A facial muscle workout treatment is a very delicate treatment of the skin that uses a lymphatic flow technique to remove toxins from the face and body. The facial muscle workout will aid in circulation and increase the healing rate. The circulation allows the body to bring nutrients to and wastes from the tissues. When the distance between the tissues and blood is small, it is easier for the blood to give the tissues oxygen so they can heal. Swelling for example increases this distance, therefore pro-longing the healing process. The facial treatment can alleviate the swelling, reduce water retention of the face and neck and work the muscles which produce firmer and healthier looking skin. The Vibraport® not only allows you to perform facial lymphatic drainage treatments that not only help with post-surgery, circulation and rejuvenation of the skin (reduction of wrinkles) but also create a non-invasive face lift that will leave your clients feeling and looking great.

Unit Advantages:

- Versatility: Pole, Table Top and Wall Mountable
- Portability: In-mold handle and smooth casters to easily move from room to room
- CPS Indicator on Control Panel
- Power-on Indicator Lamp
- All machines are 24 volt operation, with our proprietary power supply provided at no additional charge, to convert 110 volt thru 240 volt input to 24 volts.

Product Specifications

Motor -	1/35 Horsepower
Output Speed -	20-60 Cycles Per Second
Applicator Packages -	Micro(MCT) Pkg
Unit Dimensions -	10 1/2" H x 4" W x 4" D
Assembled Dim.-	44" H x 21" W x 21" D
Power Cord -	10' Hospital Grade
Drive Cable -	5'
Configurations -	Caster-Stand, Table-Top, or Wall Mounted
Speed Control -	Solid State Electronic
Housing Material -	ABS Cyclolac
Unit Weight -	13.5 Lbs.
Assembled Weight -	23 Lbs.
Shipping Dimensions -	22" x 21" x 17 3/8"
Shipping Weight -	33 Lbs.
Power Source -	110V or 220V
Current Leakage -	under 75 MicroAmps
